JOURNAL OF APPLIED ELECTROCHEMISTRY 21 (1991) 1125–1129

Index to Volume 21 (1991)

The subject index has been organized into topics for easy reference.

Subject Index

Batteries, fuel cells

AC impedance studies on nickel oxide electrodes to determine self-discharge characteristics of Ni–H_2 batteries, 95
A zinc-air cell employing a packed bed anode, 105
The manganese dioxide electrode Part XI: an X-ray diffraction study of materials produced by H insertion into an EMD, 130
On the characterization of oxygen recombination in sealed lead-acid batteries, 221
Polymer electrolyte lithium batteries rechargeability and positive electrode degradation: an AC impedance study, 301
A method of IR drop measurement using a current interruption technique: an application to half cell studies with porous gas diffusion electrodes, 368
Characterization of gas flow configurations for phosphoric acid fuel cells, 395
Dynamic simulation of the charge-discharge characteristics of the sodium-sulphur cell, 409
Different commercial grades of aluminium as galvanic anodes in alkaline zincate solutions, 452
Air and fuel starvation of phosphoric acid fuel cells: a study using a single cell with multi-reference electrodes, 524
Performance characteristics of zinc-*N*,*N*′-dichlorodimethyl hydantoin primary cell, 555
Dependence of the performance of solid polymer electrolyte fuel cells with low platinum loading on morphological characteristics of the electrodes, 597
Cyclic charge-discharge behaviour of sintered plate cadmium electrodes in the presence of organic additives, 646
Computer simulation of high-discharge-rate battery systems, 767
Nafion®-bonded porous titanium oxide electrodes for oxygen evolution: towards a regenerative fuel cell, 982
Experimental and theoretical analysis of a thermogalvanic undivided flow cell with two aqueous electrolytes at different temperatures, 1103

Catalysis, kinetics

The wall-jet electrode and the study of electrode reaction mechanisms: the EC′ (catalytic) mechanism, 2
The hydrogen evolution reaction in an acid medium on nickel electrodeposited with $SiW_{12}O_{40}^{4-}$ or $SiMo_{12}O_{40}^{4-}$ from electrolytes of various anionic compositions, 73
Double-channel electrodes: Homogeneous kinetics and collection efficiency measurements, 208
Non-uniform accessibility and the use of hydrodynamic electrodes for mechanistic studies: a comparison of a wall-jet and rotating disc electrodes, 295
Characterization of DSA®-type oxygen evolving electrodes: choice of coating, 335
The influence of carbon monoxide on the voltammetric behaviour of nickel in acid solutions, 435
Electrocatalytic activity of nickel black electrodes for the hydrogen evolution reaction in alkaline solutions, 440
The hydrogen evolution reaction in an acid medium on nickel electrodeposited with $PMo_{12}O_{40}^{3-}$ or MoO_4^{2-}, 457
In situ activation of cathodes during alkaline water electrolysis by dissolved iron and molybdenum species, 508
Preparation and modification of hydrous thick cobalt oxide layers: voltammetric characteristics of rough Co_3O_4-spinel-type electrodes, 516
Oxygen evolution in 30% KOH at 70°C on nickel anodically coated with $CoOOH/Co_3O_4$, 612
Iridium-tin mixed oxide coatings, 678
Effect of substitution of SnO_2 for TiO_2 on the surface and electrocatalytic properties of RuO_2 + TiO_2 electrodes, 858
Oxygen reduction on poly(4-vinylpyridine)-modified ordinary pyrolytic graphite electrodes with adsorbed cobalt tetra-sulphonated phthalocyanine in acid solutions, 973
The effect of metallic impurities on the hydrogen evolution reaction on group-Ib metals in alkaline solution, 1027

Corrosion, passivation

Electrochemical behaviour of a zinc electrode in 8M KOH under pulsed potential loading, 84
The stability of hydrous oxide films on platinum, 151
Effect of hydrogen on impedance of the passivating film on iron, 181
Effect of fluoride ions on the corrosion of aluminium in sulphuric acid and zinc electrolyte, 238
Influence of some organic compounds on the corrosion mechanism of carbon steel (XC38) in 3% NaCl II. Orthoaminothiophenol (C_6H_7NS) and surfactant dodecyl sodium phosphate ($C_{10}H_{21}PO_4Na_2$), 261
The passivation of nickel in 0.5 M sulphuric acid, 276
Nature and corrodibility of thin oxide films formed on niobium in NaOH solutions, 346
The corrosion of copper in ethylene glycol-water mixtures containing chloride ions, 358
Voltammetric behaviour of iron in cement. III. Comparison of iron versus against reinforcing steel, 425
The influence of the electrochemical treatment on Cu–Al–Ag alloys in deaerated 0.5 M NaOH, 446
Alloys cathodically modified with noble metals, 471
Morphologies of anodic oxide films deduced from dissolution studies, 483
Electrooxidation/electroreduction processes at composite iron hydroxide layers in carbonate-bicarbonate buffers, 543
Tosyl-hydrazine, 4-nitrobenzoyl-hydrazine and terephthalyl-hydrazine as inhibitors for the corrosion of copper and aluminium in sulphuric acid, 625
Corrosion behaviour of electrodeposited zinc-nickel alloys, 642
Characterization of copper oxidation by linear potential sweep voltammetry and UV – Visible-NIR diffuse reflectance spectroscopy, 697
Breakdown voltage and electronic current studies of tantalum-tantalum oxide electrolyte systems, 729
Passivity of α-brass (Cu : Zn/67 : 33) and its breakdown in neutral and alkaline solutions containing halide ions, 829
High-temperature chlorine corrosion of technical carbons Part II. Anodic corrosion in chloride melt, 929
Corrosion behaviour of lead-copper alloys in sulphuric acid for battery applications, 1013
Anodization of niobium in sulphuric acid media, 1023

Deposition processes

Zinc-nickel coatings: relationship between additives and deposit properties, 44
Electrodeposition of silver powder by pulsating and reversing currents, 50
Electrodeposition of Ni-transition alloys for the oxygen evolution reaction, 55
Electrochemical behaviour of a zinc electrode in 8 M KOH under pulsed potential loading, 77
Influence of potassium sodium tartrate on the initial stage of silver electrodeposition, 170
Effect of surface conditioning of zinc nucleation using aluminium cathodes, 231
Electrocrystallization: fundamental considerations and applications to high current density continuous steel sheet plating, 377
Electrochemical and chemical reactions in baths for plating amorphous alloys, 496
Some fundamental aspects of levelling and brightening in metal electrodeposition, 565
Electrodeposition of Ni–Cu–Mo ternary alloys from citrate electrolytes, 606
Electrodeposition of Fe–Ni–Co alloys Part I: Direct current deposition, 672
Dispersion deposition of metal – particle composites and evaluation of dispersion deposited nickel – lanthanum nickelate electrocatalyst for hydrogen evolution, 683
Electrochemical nucleation of nickel ion vitreous carbon electrodes: the influence of organic additives, 709
The effect of pause-to-pulse ratio on the morphology of metal powder particles electrodeposited by square-wave pulsating overpotential, 743
Electrochemical investigations of the autophoretic coating process, 877
Activated basket anodes from nickel powder Part II: Laboratory facilities for assessing the performance of anodes in nickel electroplating baths, 961

Electrochemical engineering

Local current densities in a two rotating disc electrode system with an axial electrolyte inlet measured by an autoradiographic method, 6
Calculation of mean current densities in a two rotating disc electrode system, 111
The effect of random perturbations on the performance of tank electrolysers, 118
An investigation of the spouted bed electrode cell for the electrowinning of metal from dilute solutions, 124
Application of porous flow through electrodes IV. Hydrogen evolution on packed bed electrodes of iron spheres in flowing alkaline solutions, 166
Behaviour of a tall vertical gas-evolving cell. Part I: Distribution of void fraction and of ohmic resistance, 386
Estimation of current bypass in a bipolar electrode stack for current-potential curves, 415
Electrochemical engineering – Towards 2000, 463
Calculation of steady-state distributions of concentrations and potential controlled by diffusion and migration of ions, 487
Effect of anode material and bath composition on bubble layer resisitivity and gaseous volume fraction in an aluminium electrolysis cell with sloping anode and cathode, 716
Behaviour of a tall vertical gas-evolving cell Part II: Distribution of current, 753
Theoretical and experimental studies of current distribution in gas evolving electrochemical reactors with parallel plate electrodes, 760
Effect of silicate on the membrane-type chlor-alkali-cell, 781
The continuous stirred tank electrochemical reactor. An overview of dynamic and steady state analysis for design and modelling, 945
Study of a laboratory filter-press cell by impedance spectroscopy, 991

Electrochromic effects, photoelectrochemistry

A tungsten-trioxide/Prussian blue complementary electrochromic cell with a polymer electrolyte, 203
Indium hexacyanoferrate(III) coating form stabilizing polycrystalline CdSe photoelectrodes, 430
Kinetics and mechanism of the electroreduction of anodic layers produced on cadmium in alkaline solution containing sodium sulphide, 816

Electrosynthesis

Electrosynthesis at oxide coated electrodes Part 2. The oxidation of alcohols and amines at spinel anodes in aqueous base, 11
The electrochemical synthesis of aminonitriles I. H-cell studies with adipontrile and azelantrile, 21
Indirect electroreduction of o-nitrophenol to o-aminophenol on titanium dioxide coated titanium electrodes, 60
Low severity coal conversion by an electroreduction route, 143
New methods of uranium(IV) production using a Pt-loading gas-diffusion electrode, 226
Electrolytic equipment for reductions in liquid ammonia, 267
Simultaneous electrolytic production of xylitol and xylonic acid from xylose, 321
Electrosynthesis of *N*-methylhydroxylamine, 331
Electrosynthesis of quaternary ammonium hydroxides, 365
An efficient method for the electrochemical preparation of Co(III) acetate, 504
The electroreduction of carbon monoxide at metal/zirconium hydrogen phosphate interfaces, 552
Electrochemical oxidation of sulphite ions at graphite electrodes, 588
Hypochlorite production II. Direct electrolysis in a cell divided by an anionic membrane, 637
Electrochemical impedance study of the reaction mechanism for electro-oxidation of isosorbide, 690
Nucleophilic substitution of halogeno-nitrobenzenes by superoxide ions electrocatalyzed by metallopophyrins, 740
The role of supporting electrolyte during the electrocatalytic hydrogenation of aromatic compounds, 799
Amino-alcohol electrosynthesis. Modelling of a set-up for producing amino-2-methyl-2-propanediol-1.3, 805
Synthesis of 5-amino salicyclic acid at a Ti/TiO_2 electrode, 839
Electrochemical hydrodimerization of formaldehyde to ethylene glycol, 895
In situ multiple internal reflection Fourier transform infrared spectroscopic (MIRFTIRS) study of the electrochemical immobilization of heteropolyanions in poly(1-naphthol) coated electrodes, 902
Coupling between electrolysis and liquid-liquid extraction in an undivided electrochemical reactor: applied to oxidation of Ce^{3+} to Ce^{4+} in an emulsion Part I. Experimental, 915
Coupling between electrolysis and liquid-liquid extraction in an undivided electrochemical reactor applied to the oxidation of Ce^{3+} to Ce^{4+} in an emulsion Part II. Cell modelling, 922
Optical properties of electrically conducting films formed by anodic oxidation of 1,2-di(2-thienyl)ethylene, 935
Cathodic reduction of oxygen at new iron complexes, 1005

Mass transfer, hydrodynamics

Mass transfer at rotating cone electrodes, 32
Mass transfer in annular electrolytic cells with gas stirring, 40
Mass transfer at the gas evolving inner electrode of a concentric cylindrical reactor, 537
Mass transfer and flow rate measurements for a system of two rotating disc electrodes with an axial electrolyte inlet, 583
A mass transfer study of the electropolishing of vertical discs under free convection, 651
Behaviour of carbon felt flow by electrodes Part I: Mass transfer characteristics, 793
Mass transfer rate measurement of short time liquid phase epitaxial growth using an electrochemical method, 998
Use of the polarographic method to measure wall shear stress, 1038
Use of electrochemical techniques to study natural convection heat and mass transfer, 1047
Inertial characteristics of velocity and shear stress electrochemical probes, 1058
Electrodiffusional determination of momentum transfer in annular flows: axial developing and swirling decaying flows, 1063
Interrelation of current and concentration at electrodes, 1068
Electrodiffusional direction-specific probe for measuring local velocity of aerated aqueous systems, 1073
Unsteady mass transfer in turbulent flow close to a rotating cylinder, 1077
Mass transfer enhancement by suspensions in a shear flow, 1081
Electrodiffusional characterization of non-Newtonian flow through packed beds, 1087
Effect of ohmic losses on potentiostatic transient response of a reversible redox system, 1091
Electrodiffusional diagnostics of gas-liquid flows: techniques and instrumentation, 1095
Turbulent pulsations of the microelectrode limiting diffusion current, 1099
An electrochemical mass transport sensor to study agitation in electroplating processes, 1114

Membranes

Ion exchange membranes and separation process with chemical reactions, 283
Measurement of the ionic conductance of regenerated cellulose membranes in alkaline solutions with attention to current refraction, 327
Transport and conductivity properties of an advanced cation exchange membrane in concentrated sodium hydroxide, 402
The behaviour of ion exchange membranes in electrolysis and electrodialysis of sodium sulphate, 869

Materials

The effect of heat-treatment on the properties of activated carbon fibre cloth polarizable electrodes, 28
Problems in DSA® coating deposition by thermal decomposition, 136
Surface properties of the system: hard metal/Co coating/electrolyte, 619
Electrochemical and reflectance study of the conversion of zinc oxide by hexacyanoferrate(II) in offset lithography Part I. Zinc electrochemistry with minor components, 774
Potentiostatic pulse technique to determine the efficiency of hydrogen absorption by alloys, 967

Mineral and metallurgical electrochemistry

The effect of Co^{2+}, Cu^{2+}, Fe^{2+} and Fe^{3+} during electrowinning of nickel, 64
The refining of lead by the Betts process, 189
The effects of Dowfroth, antimony and Saponin on zinc electrowinning from Kidd Creek electrolyte, 213
Effect of some aromatic nitro compounds on the passivation of copper anodes during electrorefining, 247
Gas-diffusion electrodes catalysed with tungsten carbide as anodes for nickel electrowinning, 313
Electrolytic recovery of iron from pickling solutions by tungsten carbide gas-diffusion anodes, 317
Determination of leaching rates of precious metals by electrochemical techniques, 419
The interaction of iron species with pyrite surfaces, 531
Electrochemical and XPS studies on the surface oxidation of synthetic heazlewoodite (Ni_3S_2), 575
Correlation between mass transfer and operating parameters in zinc electrowinning, 785

Molten salts

Selecting an optimum electrolyte for zinc chloride electrolysis, 158
Electrochemical behaviour of titanium(II) and titanium(III) compounds in molten lithium chloride/potassium chloride eutectic melts, 351
Corrosion of metals in molten lithium sulphate-potassium sulphate eutectic, 632
Electrochemical reduction of lead chloride on some solid electrodes in fused NaCl–KCl mixtures, 824

Solid State

Carbon activity measurement using a solid state potentiometric cell: application to boron carbides, 175
Calcium β''-alumina and Nasicon electrolytes in galvanic cells with solid reference electrodes for detection of sulphur oxide in gases, 308
A fully automated four-probe d.c. conductivity technique for investigating solid electrolytes, 721
Thermodynamic stability of magnesium chromite from e.m.f. measurements, 837
The electrochemistry of Magnéli phase titanium oxide ceramic electrodes Part I. The deposition and properties of metal coatings, 848
Synthesis of InSb and $In_xGa_{1-x}Sb$ thin films from electrodeposited elemental layers, 863

Water, effluent treatment

Electrochemical waste water treatment using high overvoltage anodes Part I: Physical and electrochemical properties of SnO_2 anodes, 14
Electrochemical waste water treatment using high overvoltage anodes Part II: Anode performance and applications, 99
Reticulated vitreous carbon cathodes for metal ion removal from process streams Part I: Mass transport studies, 659
Reticulated vitreous carbon cathodes for metal ion removal from process streams Part II: Removal of copper(II) from acid sulphate media, 667
Anodic oxidation of phenol for waste water treatment, 703
Removal of chromium from aqueous solutions by treatment with fibrous carbon electrodes: column effects, 734
Pulse electrogeneration of bubbles for electroflotation, 986
